Letter of Recommendation

To Whom It May Concern,

I am pleased to recommend Neerav Dureja, a Grade 10 student, whom I know as a young student innovator actively working on building impactful ideas.

Neerav has demonstrated a strong inclination towards entrepreneurship and problem-solving. He shared his work on "Diplomacy Forge," which reflects clear thinking, structured approach, and strong intent to create real-world impact.

What stands out is his willingness to seek feedback and improve continuously. This mindset makes him a promising young innovator.

I strongly believe he has the potential to grow and contribute meaningfully in any high-performance academic environment.

Sincerely,

Aryan Raj
